NUMBERS AND LETTERS

In this project, we will develop a website which provides users to play a game. The user can sign up & sign in the website and play the game. The user solves the number and letter questions by turns against time and earns point. Faster answers gives more points.

Aim of the number part of the game is to reach a number with using given numbers by adding, multiplying, subtracting or dividing them. Aim of the letter part of the game is to find the longest possible word by using given letters and a joker letter which can be used for a any letter desired. The game will finish after asking 5 number and 5 letter questions by turns. At the end of the game, the user can see total gained score.
